

## Courier Sample Pick Up Conditions

To maintain the integrity of incoming lab samples we will be reinforcing the conditions of the samples at the time the courier picks up. All samples must be in a sealed container. As an additional security measure the courier will be adding a seal to the top of the sample packages at the time of pick up. Below are examples of acceptable and not acceptable sample conditions.

Acceptable

Not Acceptable

Secured Sample

Samples ***must not*** be falling out of the container. It is preferred that sample (s) are sealed prior to courier arriving for pick up. Also, include Sample Submission form with samples inside the sealed container.

Non Sterile Bags

Sterile Bags

If you are in the need of sterile sample bags in order to submit samples please contact your supplies AFL representative at 972-336-0336 or you may email your request to [Supplies@afltexas.com](mailto:Supplies@afltexas.com)
